目 次

(研究論文)

(技術レポート)

電子顕微鏡による組織観察のための微小試料の断面研磨方法		
	松田知子 · · · 23	6
食品用途向け低解繊ナノファイバー素材の特性評価及び食品への活用		
高重至成、内川拓也、	有福一郎 · · · 27	1

No. 26 2023

CONTENTS

(Research Papers)

Development of work dynamics management technology using human body communication	
Katsuhiro Kusumoto	1
Mechanism of high frequency induction heating for short time Effect of hardened depth for short time quench hardening	
····· Takahiro Sato,Tomoaki Ikuta, Kengo Nojima, Tomoki Fukue, Hidefumi Mada	7
Development of selective high-frequency induction heating using magnetic flux density control tool	
Takahiro Sato,Tomoaki Ikuta, Kengo Nojima, Tomoki Fukue, Hidefumi Mada	13
Development of Frozen Broccoli with Flower Buds that Do Not Easily Fall Off and Retain Texture	
Hiroshi Nakano, Mie Honda, Dai-ichiro Yoshida, AkikazuTanioka and Yukitoshi Kodani	19

(Technical Reports)

Cross-section polishing method for micro samples used in microstructural observation by electron microscopy	23
Characterization of low-fibrillated nanofiber materials as food materials and the utilization for food products Shisei Takashige, Takuya Uchikawa and Ichiro Arifuku	27

(List of literatures accepted in other journal)		33
